

ENVIRONMENT POLICY

RollsPack Pty Ltd is cognisant of its responsibilities to its employees, the community and the environment.

RollsPack is committed to product stewardship, the management of its operation and the design of its products in an environmentally responsible manner.

To ensure that an environmentally responsive behaviour is integral to its operations, RollsPack has committed to:

- operate in compliance with all relevant local environmental legislation, regulations, licences and other requirements.
- eliminate sources of pollution and achieve cost effective improvement in environmental performance.
- optimise resource inputs, production methods and customers' quality expectations to minimise the environmental impact of products
- establish and constantly monitor performance to environmental objectives and targets
- optimise energy and waste efficiency per unit of production
- openly emphasise environmental practices to employees, suppliers, customers, local and state government, industry associations and the community
- ensuring that environmental responsibility is an integral part of work practices, training, decision making and performance assessment through education of employees, contractors and suppliers
- continue to support the Australian Packaging Covenant (APC) and commit to its underlying philosophy
